

(Senior) DevOps Engineer (f/m/o)

Job Description

As a (Senior) DevOps engineer you will be responsible for managing our internal and customer facing cloud services. You'll be responsible for building and managing our cloud infrastructure and CI/CD systems. Furthermore you'll be tasked with designing and running the network architecture of our cloud services and help building a monitoring infrastructure for our platforms edge nodes.

This DevOps engineer role presents an excellent opportunity to make a real difference in a small but growing company. You'll gain exposure to a range of software and hardware products, working with a team of technologists in a collaborative environment. Excellent opportunities for personal growth and responsibility from day one.

Company and Product

We are an enterprise backed start up set at revolutionising the way aircrafts are managed and monitored. Our software targets cutting-edge technology in the aerospace and transportation sector rethinking how software is developed and deployed in the aerospace sector. We use Kanban to maximize our productivity while minimizing management overhead.

Required Skills

- Demonstrated experience in managing and maintaining production servers
- solid knowledge of Linux, knowledge of RTOS is a plus
- Experience with implementing systems monitoring
- solid knowledge of scripting languages and automation (Chef, Puppet, Ansible)
- Experience with application scaling & capacity management
- Experience with task automation and CI/CD
- Experience with AWS services (IAM, ECS, ECR, cloud formation, Route53)
- Experience with openStack is an advantage
- Knowledge of container technologies: Docker, Docker Compose, Kubernetes, etc
- Advanced Knowledge of Cloud Services, SaaS, PaaS, IaaS is a plus
- Knowledge of Network Protocols/Security/Administration is desired
- Passion for high quality software and an interest in modern / emerging technologies
- Motivated and self-managing with excellent communication skills.
- Knowledge of German would be nice, but is purely optional.

Perks of working for PaxLife

- young welcoming team with flat hierarchies
- competitive salary
- 30 days of holidays
- home office and flexible working hours
- free drinks
- a nice Villa close to the lake (Heiliger See)
- MarioKart tournaments on the company's Switch Console
