

# Lead Developer (f/m/o)

## Job Description

As a Lead developer you will be responsible for the end-to-end delivery of new products and the enhancement of existing services; you'll be overseeing the development of our APIs on the frontend as well as on the backend.

The lead developer role presents an excellent opportunity to shape the future of a small but growing company. You'll gain exposure to a range of software and hardware products, working with a team of technologists in a collaborative environment. Excellent opportunities for personal growth and responsibility from day one.

## Company and Product

We are an enterprise backed start up set at revolutionising the way aircrafts are managed and monitored. Our software targets cutting-edge technology in the aerospace and transportation sector rethinking how software is developed and deployed in the aerospace sector. We use Kanban to maximize our productivity while minimizing management overhead.

## Required Skills

- Solid knowledge of project management tools (Atlassian)
- Demonstrated leadership in agile (Kanban/Scrum) teams
- solid experience of software development, Backend and Frontend
- Experience in designing software architectures and (REST) APIs
- Experience with container and virtualisation technologies
- Working knowledge of Linux, git, CI/CD and ticket systems
- Working knowledge of cloud services like AWS and openStack
- Solid knowledge of testing frameworks and approaches
- Passion for high quality software and an interest in modern / emerging technologies
- Motivated and self-managing with excellent communication skills.
- Knowledge of German is an advantage.

## Perks of working for PaxLife

- young welcoming team with flat hierarchies
- competitive salary
- 30 days of holidays
- home office and flexible working hours
- free drinks
- a nice Villa close to the lake (Heiliger See)
- MarioKart tournaments on the company's Switch Console
